

Your family's math department.

Adaptive teaching software for homeschool families with children aged 10–18. Each child has their own starting point, teaching approach, pace, and written goals.

What we handle

The teaching, explanations, practice, checks, and review. Course records, parent reports, participation alerts, annual outside assessment, and SAT Math and ACT Math preparation are included in the offer.

What you handle

Make room for at least seven active hours of math each week for each child. You choose the times. Help the routine recover if participation falls short.

The family rate

THE FOUNDING 20 FAMILY OFFER

Standard enrollment

~~\$1,200~~

per child

per month

Founding family

\$999

whole family

per month

One family fee. Your rate, locked for life.

After our testing cohort, we're welcoming our first 20 enrolling families. As a founding family, you get this special rate for all your children aged 10–18. Younger siblings join free when they turn 10.

The first payment

No charge until every child starting now passes their first mastery check, or you see the day-28 results and choose to continue. No automatic first charge. If you do not continue, you owe nothing.

Why consider this instead of another curriculum or a tutor?

The decision is whether to hand over the full work of math teaching. A curriculum supplies material; a tutor's remit depends on the arrangement. KiwiCompass brings the sequence, explanations, practice, checks, reporting, and written goals into one family program.

What you can look at together now

[Three teaching examples](#) · [A sample weekly brief](#) · [A sample learning plan](#)

The longer-term guarantee

If a child keeps the agreed routine and misses a written goal at review, family billing pauses while teaching continues, for up to 12 months under the guarantee. The full founding terms govern the offer.
